LECOCO KIDS BIKE

LEADER BRAND OF
PARENTING FREELY

LECOCO was born in Bologna, Italy,  adjacent to the city of world's top super car - Modena. Since its establishment in 2009, LECOCO has been pursuing safety, quality, and innovation in design, dedicated to the professional development and production of kid bikes. With the principle of "love sports, no accidental injuries" and driven by functional innovation,

LECOCO continually interprets the new ways of using kid bikes, launching a variety of safe products that perfectly combine competitive entertainment and advanced "Parenting freely" concepts. It allows children to enjoy the fun of "free" to the greatest extent.

As the leader brand of "Parenting freely," as well as a quality inspector and a trend pioneer, LECOCO starts from the concerns of mothers to prevent accidental injuries to kids.
